SUMMARY

Data Engineer Associate with a strong foundation in software development, experience in building automated ETL/ELT pipelines, optimizing workflows, and ensuring data quality. Skilled in SQL, Python, Snowflake, and Prefect. Collaborative and detail-oriented, with a track record of delivering reliable solutions that support business decision-making. Seeking to leverage technical expertise and problem-solving skills to make an impact in a global data-driven organization.

PROJECTS

- Audio Intelligence Pipeline : End-to-end data pipeline ingesting audio metadata from the last.fm tracks, artists, audio features processed with dbt and loaded into Snowflake for trend analysis.
- Tableau Dashboard : Created an embedded analytics dashboard integrating Tableau visualisations into a React frontend via the Tableau JavaScript API.
- WeatherAPI : ETL pipeline fetching live weather data from an open API, orchestrated with Prefect flows and schedules.
- Prof (Teacher's Assistance Tool) : Java application for attendance, grade management, notifications tasks.

EXPERIENCE

Data Engineer Associate

Fulz Technologies, Nagpur, India Feb2025 - Present

- Implemented IP whitelisting and SQL script versioning to ensure secure access, maintain version control, and support seamless database migration.
- Tested, debugged, and optimized Prefect flows, enhancing reliability and reducing pipeline failures.
- Configured and deployed Prefect flows with triggers and schedules via Azure DevOps CI/CD, streamlining workflow automation and release management

Software Developer (Graduate Engineering Trainee)

UNext Learning, Bangalore, India Sept 2020 - Sept 2021

- Developed backend features for an edtech platform using Java, enhancing online education during the pandemic.
- Optimized reporting with SQL, improving result retrieval speed by 40% and boosting user satisfaction by 25%.
- Streamlined development with SVN, Jira, Eclipse, and Jenkins, ensuring efficient version control, tracking, and CI/CD.

Software Engineer Intern

Bizsense Solutions Pvt. Ltd. Nagpur, India June 2019 - Dec 2019

- Developed a mobile application system as an extension to the web-based ERP product.
- Integrated and created APIs for mobile app data management, resulting in enhanced user experience.
- Utilized Git for version control, ensuring a seamless and collaborative development process.
- Coordinated activities that promote inclusion in a diverse workplace environment during the company's foundation week.
